Profile

I'm a passionate web developer specializing in building dynamic and responsive web applications. With a keen eye for detail and a commitment to delivering high-quality work, I strive to create web experiences that are not only visually appealing but also user-friendly and efficient.

Education

Bsc. Computer Science and Information technology,
Bhaktapur Multiple Campus, Tribhuvan University ⧉
(4th year 8th sem)

2021 Apr – present
Bhaktapur, Nepal

A-Levels, *Orient College* ⧉

2018 May – 2020 Aug
Kathmandu, Nepal

Professional Experience

Junior Frontend Developer, *Envision Nepal* ⧉

2023 Dec – present
Kathmandu, Nepal

- Designed and implemented reusable React components to build dynamic user interfaces, ensuring consistency and efficiency across the application.
- Integrated RESTful APIs to fetch, display, and manipulate data in real-time, enhancing application interactivity and functionality.
- Collaborated with team members using Git for version control, participating in code reviews, and contributing to shared codebases on platforms like GitHub.
- Worked closely with UI/UX designers to translate design mockups and wireframes from Figma into interactive and intuitive user interfaces.
- Worked with node js and sqlite in some of the projects

React Intern, *Envision Nepal* ⧉

2023 Aug – 2023 Dec
Kathmandu, Nepal

- Advanced understanding of React.js and JavaScript ES6+
- Proficiency in front-end development tools and libraries
- Strong problem-solving skills and ability to work in a team environment
- Experience with Agile methodologies and collaborative development

Skills

- React
- JavaScript
- SASS

- HTML, CSS
- Next.js
- Tailwind CSS

Projects

Artistry Novel, *E-Commerce Website* ⧉
Developed a full-featured e-commerce platform for selling art using Next.js, MongoDB, and Tailwind CSS. The application offers a seamless user experience with features like user authentication, dynamic product listings, a secure shopping cart and checkout system, and an artist dashboard for managing art pieces. I implemented responsive design, server-side rendering, and integrated a payment gateway (Khalti) to enhance performance and functionality.

Hamro Blood, *Blood Bank Website* ⧉
Developed a blood bank management website using Next.js, MongoDB, and Tailwind CSS. The platform features a user interface for requesting blood and an admin panel for managing and responding to requests. Implemented responsive design for an intuitive experience, efficient data handling with MongoDB, and real-time updates for blood request statuses. The system enhances blood donation processes and streamlines request management.

Gunasho, *Governmental website for Envision Nepal*
Developed the frontend of a government complaint management website using React.js. The platform enables citizens to submit complaints and provides an admin panel for managing and addressing these complaints. Integrated the frontend with the backend via APIs to ensure seamless data handling and communication between users and administrators.

Vacancy, *Job vacancy website for Envision Nepal*
Developed a job portal website using React.js that connects companies and job seekers. The platform allows companies to post job listings and enables job seekers to apply for positions. Additionally, it features an admin panel for managing company and user accounts, as well as overseeing other platform functionalities.

Lokkosis, *Learning management system for Envision Nepal* ⧉
Developed a learning management system using React js for loksewa aspiring students to prepare for the exam. The platform provides courses, exams and other features for preparation of loksewa. Additionally it provides admin panel all created using react js for the management of the website.
